

Identity Finder How it Works

1 Get Identity Finder

Visit the UConn Identity Finder website in order to learn more about what the Identity Finder software does and how it works.

<http://identityfinder.uconn.edu>

Download the appropriate version of Identity Finder (On University-owned computers, use the Enterprise version, and on Personally-owned computers, use the personal version) by going to the appropriate section and clicking the "Download" button for your operating system version.

Run the installer.

2 Search Your Desktop

Run Identity Finder by going to *Start → Programs → Identity Finder*

Use the Wizard to search for unsecured sensitive data, such as social security numbers, passwords, and credit cards

Let Identity Finder automatically find anything that could be used to commit identity fraud against you

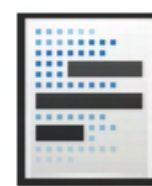

3 Protect Your Identity

Shred files you don't need containing your sensitive information

Scrub private data in files you want to keep

Secure important files that contain private data
