The policies published on the web represent the most recent guidelines and information. For the most part, this information is applicable for all students, or, all students can elect to follow the current policies. However, the policies in effect at the time of your matriculation constitute the official policies that govern your program and your curriculum. Please refer to the effective date of any policy to determine if it applies to your situation. There will be links to policies and procedures that pre-date what is current, to correspond with all matriculation dates.

The School of Nursing must conform to all of the policies of the University. The University, however, leaves a number of options available to individual schools and this Handbook provides information that conforms to, and supplements, the policies of the University. Please refer to the links that interface with the policies of the University throughout this document.

This web version of the BS Handbook is considered the official document reflecting the policies and procedures of the Undergraduate Program.
